

Questions:

How many bundles of rags and what kind. What will they be used for?

How many 3 x 4 mats? Do you already own mats that I will launder or will you be needing new?

Same question for the 3 x 10 mats?

Coveralls how many per delivery do you already own or will you be needing them and sizes. What will be on the coveralls oil grease etc.

What will be the delivery schedule daily every other day etc?

Answer:

We typically receive 188 rags per week which cover our Special Purpose, General Purpose and Refueling Maintenance shops (this could fluctuate a few either way as long as we have a steady supply on hand). The rags we're looking for are the shop rags, red, and right on 12"x12".

The mats will need to be provided by the vendor as we're restarting this program we stopped during the sequestration (to save money) a couple years ago.

5 each 3x4 mats and 2 each 3x10 mats. We will require weekly replacing in the winter and spring - possibly monthly during the summer.

The uniforms are currently owned by the vendor and would require sizing which we can provide. Each mechanic would require 2 per week be cleaned/replaced (usually around 20 mechanics require coverall replacement). Basic shop dirt, blood, grease, hydraulic fluid, oil, and gas paint the coveralls daily.

Only once a week. We'd prefer Tuesday or Wednesday.
